For more info, see individual product pages

EasyClean®

A specially-coated surface lets you wipe away spills and splatters and keep your stainless steel cooktop looking like new.*

Sync Zone

Combine the left two induction or electric burner elements for versatile cookware sizes and shapes.

Simmer Key

Conveniently achieve the perfect simmer with just a tap with a dedicated simmer button.

Backlit Controls / LED Bar

Backlit controls offer sleek style and clear visibility, while red LED bars show each element's power level at a glance.

SmoothTouch™ Controls

Hidden when off and easy to clean, backlit glass controls offer effortless style and simple, touch-responsive operation.

Compatability Indicator

Easily see how well your cookware matches each element to optimize performance and energy efficiency.

Boost Mode

Need extra cooking power? Activate Boost Mode to maximize an element's power output for quick boiling or searing.

Hood and Microwave Sync

Sync with your LG Hood or Microwave via the LG ThinQ® app to auto-activate the fan and lights when cooking.

Safety Knobs

Push-to-turn safety knobs help prevent accidental activation, adding peace of mind and precise control to your cooking.

Auto Reignition

Automatically reignite the burners if the flame accidentally goes out, ensuring safer, uninterrupted cooking.
