The boundaries between our workplaces, homes, and the spaces in between have dissolved. Today, work transcends physical locations—it's an experience, a mindset, and a space that knows no bounds.

**At the intersection of innovation and collaboration,
LG and Cisco unite their strengths to redefine digital interaction.**

LG display products and Cisco collaboration technology combine to deliver an ideal solution for engaging teams across multiple locations through video meetings, presentations, and whiteboarding.

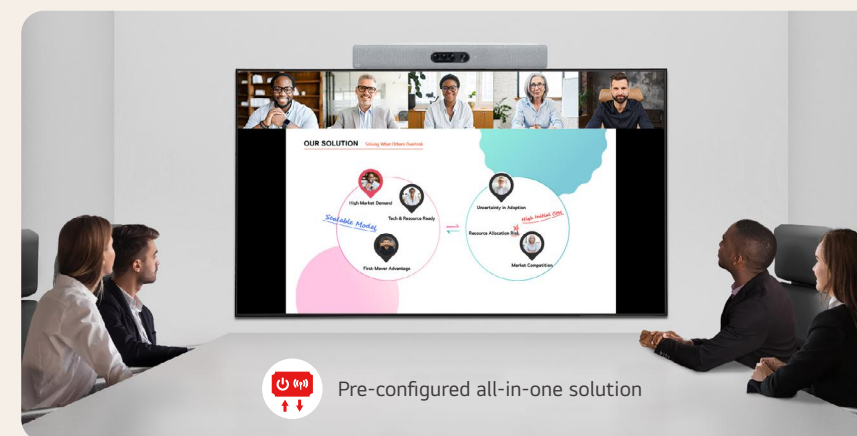

Seamless integration of Cisco-certified LG displays simplifies installation, setup, and management. Key features include automatic no-touch configuration for optimal video experience, synchronization of active and standby modes for efficient power management based on people presence, automatic display input configuration, and unified remote management of workspaces from Cisco Control Hub, enabling a reliable and high-quality experience.

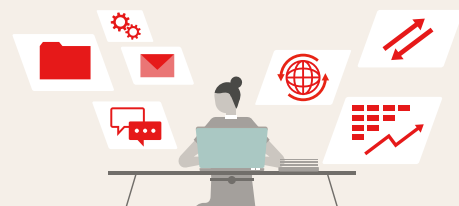

Video Conferencing Made Simple.

Connect Cisco device via HDMI to LG display for Zero Touch Setup

Zero Touch Setup for Seamless Conference Room Integration

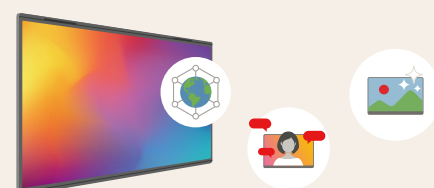

- Automate device provisioning and control and allow your team to focus on collaboration rather than technology management.
- Accelerate the setup process and ensure seamless integration between LG display and Cisco device.

Remote Management for Enhanced Convenience and Control

LG displays can send status information to the Cisco device, which can also control the LG displays via an HDMI cable. Additionally, remote diagnostic of LG displays can be performed through the LG ConnectedCare and the Webex Control Hub management dashboard.

* 'LG ConnectedCare' needs to be purchased separately.
* HDMI cables are sold separately.

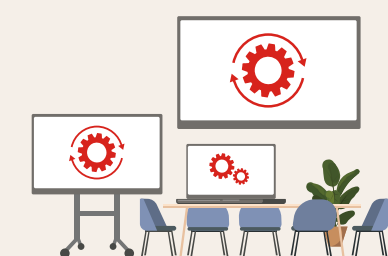

Best Color Scheme for Video and Presentation Formats

LG's reliable and durable professional displays, when combined with Cisco's video, collaboration, and network technology, deliver exceptional visual quality.

Unified Connectivity: LG's Displays and Cisco's Videoconferencing Platform

- Seamlessly connect with your preferred collaboration platforms, such as Webex, Microsoft Teams, Google Meet or Zoom

Seamless User Experience

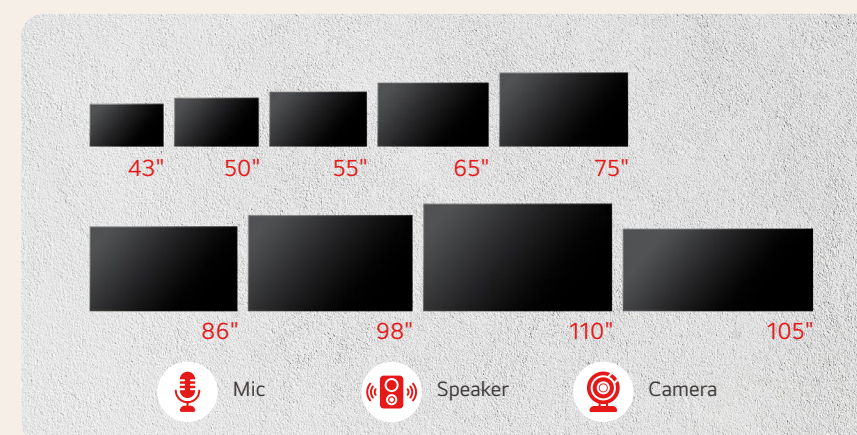

With Cisco's Zero Touch Setup, LG equipment can be seamlessly integrated without additional manual configuration, significantly reducing the time required for setting up conference rooms. Unified control is also possible via the Cisco Room Navigator.

Synchronized Support

Customers receive coordinated and consistent support from LG and Cisco.

Various Options Suitable for Your Meeting Room Environment

- Choose from display size options ranging from 43" to 110" for your meeting room.
- Choose from the range of Cisco video device suitable for different room sizes and user scenario.
